SAP® Solutions
SAP® Customer Engagement Initiative program, SAP Web IDE, and SAP Fiori® apps

IT consultant Flexso participated in the SAP Customer Engagement Initiative program to learn how best to migrate from Eclipse to SAP Web IDE when creating SAP Fiori apps. Now development time is halved and the firm has gained valuable product knowledge from collaboration with SAP experts.

Before: Challenges and Opportunities

- Learn to create, extend, and redesign SAP Fiori apps without coding using SAP Web IDE
- Improve implementations of the SAP software used by the firm and its 120 active customers
- Learn about planned innovations
- Influence and learn about new solutions
- Collaborate and exchange with SAP experts

Why SAP

- SAP Customer Engagement Initiative offering a structured approach for close end-to-end collaboration between customers and SAP teams during the full development cycle for planned products and solutions as well as new releases or enhancement packages

After: Value-Driven Results

- Improved development processes thanks to access to the latest information about new product features and the ability to provide feedback about existing features
- Better customer offerings with the ability to consult SAP experts and learn about planned product features
- Faster development times for SAP Fiori apps and simpler development processes using the rich tool environment provided by SAP Web IDE

“Don’t be afraid to invest in and spend time on opportunities like SAP Customer Engagement Initiative. It’s more than worth it.”

Wouter Lemaire, SAP Cloud & Technology Evangelist and SAP Mentor, Flexso N.V.

50%
