#### Challenge

- Achieve more stable solution in EWM environment
- Better visibility over Resource utilization
- Reduce complexity of canceled pick process
- Possibility of complete execution time of Inbound process with detailed time for each step
- Optimization of packing process

#### Solution

- SAP EWM upgraded to 9.1 for better stability
- Improved resource utilization with real time resource idle time report
- One step cancel pick process
- All custom reports were built with execute in background option for better performance
- Automatic closing of pack HU with single item based on packing material

#### Benefits

- Reduced steps, improved performance to achieve tighter KBI
- Reduced steps, improved performance to achieve tighter KBI
- Improved rearrangement process
